Ajay Kumar Garg Engineering , Ghaziabad.

EXPERIENCE

SENIOR CONSULTANT, GOLDMAN SACHS, BANGALORE, JUNE'2015 - PRESENT

Currently engaged in introducing new features and fixing the existing system issues.

Role : Currently working as Senior Software Consultant at Goldman Sachs for NTT Data GDS. Being a part of *Middle Office Team*, currently involved in introducing new functionality and fixing bugs in the existing system. This opportunity is helping me to learn about financial industry, transaction management, manage huge systems and how to deal with real time production issues.

Technologies : Java, Sybase, Jenkins

SOFTWARE ENGINEER, FISSION LABS, HYDERABAD, JUNE'2014 - FEB'2015

PROJECT : KOSEI, USA [ACQUIRED BY RAKUTEN]

Responsible for developing advertiser administration system as product for Fission Lab's Client KOSEI.

Role : Having a cross functional background, my role is not only bounded to some specific domain. I am assigned to work with API integration via AngularJS as well exposing services via dropwizard and setting up Jenkins CIS server too. Project's technology stack uses many latest technologies like Bower, Grunt, Gradle, Karma, Jasmine, ElasticSearch.

Technologies : JAVA, AngularJS, WebServices, MySql, Jenkins.

DEVELOPER, INNOLOGIX CONSULTING , GURGAON , OCT'2013 - MAY'2014

Previously working on this project as Developer. The objective is to create energy efficient metering and billing system, with energy usage statistics. I was responsible for generating all the reports using various APIs like iText and POI and generate usage graph and charts using HTML based Rgraph API. Also worked on developing other required functionalities like parking management, Ownership Management and Electricity Meter management etc., using AWS cloud resources like EC2, RDS and S3.

SOFTWARE ENGINEER , QCLICKET, NEW DELHI , SEP'2012 - AUG'2013

Responsible for building the product from scratch without any prior knowledge of linux and firewalls. Created the whole system and integrated it to Qlicket's Adserver. Using many network based technologies and open source tools.

TECHNICAL EXPERIENCE:

Backend Technologies : JavaEE, JPA, Java, PHP
Development Tools : Eclipse, Netbeans, TomEE, Git
Frontend Technologies : AngularJS, jQuery, javascript
Database Tools : MySQL, PGAdmin, Sqlyog
OTHERS : AMAZON WEB SERVICES
